

## A quick start guide for consultants

Your support staff will be ensuring all your patients are added to your *UKKOR* account as per your processes. You can either ask them to add your patients before they see you in clinic, or you can instruct them to add a patient after clinic by indicating this in your dictation.

You will also need to ensure your support staff knows to gather the patients e-mail address.

### 1 – Deciding the patient need surgery

Advise the patient about the UKKOR and ask them to complete their scores sent via email. If the patient is happy, ask the patient to fill in details on the Patient Registration Form (this is available on the UKKOR website).

You can request UKKOR cards to give to patients on clinic so they can browse the UKKOR site at their leisure and learn more about the knee osteotomy.

### 2 – Login

You will have been sent your details. Login to your *UKKO* account using your username, password and security question.

### 3 – Viewing your worklist

View the patients on your worklist today and ensure they have completed their outcome score electronically via e-mail. If the pre-op scores have not been completed the patient can be given a tablet to complete the scores or a paper form, which can be found on the UKKOR website.

### 4 – Adding clinical information to patient profile

After the operation, the surgeon completed the operation note or the minimal data set in the registry portal. You can do this very quickly by setting up defaults to choose from. Contact Customer Support if you would like assistance in how to do this.

If this is not possible, the surgeon completes the Paper Operation Note form, or their hospital op note, and gives to support staff to transcribe.

## 5 – Viewing your patients' scores

The patient will be automatically emailed their post-op scores, which they can complete via the patient portal. To view patients scores simply search for the patient, open their pathway and select the Clinical Scores tile on the left hand side.

That's it! If you have any questions or need support or advice, please email [customer.support@amplitude-clinical.com](mailto:customer.support@amplitude-clinical.com)
